

José Amaro

Senior Software & Data Engineer

Data & Software Engineer with a solid track record on large-scale platforms, cloud computing, and system integration. Broad expertise in GCP, AWS, event-driven architecture, distributed pipelines (NRT/CDC), and data modeling for analytical and operational environments.

Over a decade building critical data solutions, leading modernization, governance, performance, and digital transformation initiatives. Combines deep technical expertise with architectural vision, strong communication, and a focus on high-impact delivery.

10+ YEARS OF EXPERIENCE

5+ CLOUD PLATFORMS

20+ CRITICAL PROJECTS

\$ cat expertise.md

</>

Full-Stack & Backend

REST APIs, microservices and interfaces with Node.js, Python, Django and React.

🗄️

Data Engineering

Distributed pipelines, ETL/ELT, BigQuery, Dataflow, Delta Lake and CDC streaming.

☁️

Cloud & DevOps

GCP, AWS and Azure with Docker, CI/CD, ECS, Lambda and production observability.

🧠

AI & LLM Ops

RAG, LLM copilots, Vertex AI, LangChain and computer vision pipelines.

07 > Senior Data Architect

ArcelorMittal Sistemas

Fev 2025 – Atual

Responsible for architecting critical solutions in a hybrid environment, leading modernization tracks and coordinating the data engineering team dedicated to the Procurement area. Databricks + Azure stack (Delta Lake, Synapse and Purview) with medallion architecture.

-  Coordination of engineering squads focused on Procurement, aligning business, governance and SLAs
-  Medallion architecture on Databricks Lakehouse over Azure Data Lake, Delta Live Tables and Unity Catalog
-  Hybrid pipelines with streaming/CDC in Azure Data Factory, Event Hub and GCP/Node.js integrations
-  Workload automation with UC4, BizAgi, Jira and end-to-end observability in ITSM
-  Up to 35% reduction in critical procurement SLA and governance dashboard with lineage, quality score and FinOps

06 > CTO & Principal Data Architect

BeAnalytic 

Jan 2021 – Atual

Technical and strategic leadership in data solutions, generative AI and computer vision. Responsible for roadmaps, squads and product delivery for enterprise clients such as Banco BV, ArcelorMittal and Engefotos.

-  LLM copilots and RAG connected to BigQuery/Vertex AI (Banco BV & ArcelorMittal)
-  Computer vision pipeline and generative reports for Engefotos
-  Multi-cloud feature store, CDC and CI/CD pipelines for ML and analytics
-  Creation of technical leadership guilds and BeAnalytic innovation programs

05 > Data Architect

Banco BV

Mar 2022 – Dez 2024

Strategic work on the evolution of the data platform, supporting credit, analytics and BI squads with domain-driven architecture, microservices and integration with cloud platforms (GCP & AWS).

-  Node.js microservices architecture with Pub/Sub and API Gateway
-  BigQuery, BigTable, Firestore and Amazon S3 modeling
-  UC4, BizAgi, Jira/Confluence orchestrations for critical flows
-  Archimate drawings, Dataflow and agile cadence with remote teams

04 > IT Team Lead

Parceria da Construção

Mar 2023 – Ago 2023

Leadership of full-stack teams in a complex architectural migration from monolith to microservices.

-  Monolith to microservices migration with API Gateways
-  React Native, React.js and Node.js serving apps and portal
-  AWS Elastic Beanstalk, ECS, Lambda and CI/CD automation
-  PHP, Elasticsearch, Amazon S3 and RDS in hybrid environments

03 > Data Architect

GLOBAL HITSS

Nov 2020 – Mar 2023

Data architecture for a streaming and telecom platform, delivering analytics pipelines, governance and consumption layers for distributed squads.

-  BigQuery, BigTable, Firestore and MongoDB
-  Analytics pipelines with Dataflow, CDC and TDD
-  Docker products, CI/CD pipelines and versioning
-  Team enablement and data skills acceleration

AFX SYSTEM

Jan 2018 – Mai 2021

Executive leadership of digital products, defining portfolio, architecture and technical capacity building for mobile/web squads.

-  TDD, DDD, Clean Code and technical stack governance
-  React Native, React.js and automation with Docker Products
-  Scalable architecture, Data Structures and observability
-  Training and mentoring of technical leaders

Projetos Autorais & Consultoria

Jan 2018 – Mai 2020

Full-stack development on commercial projects and internal products, delivering rich interfaces, Node.js/PHP APIs and integrations with databases and AWS services.

-  Modern JavaScript, React.js and React Native
-  Node.js, PHP and domain-driven REST APIs
-  AWS (Lambda, S3, RDS) and deploy automation
-  Skills development practices and mentoring

\$ ls ./tech-stack

Cloud Platforms

- GCP
- BigQuery
- Dataflow
- AWS
- Lambda
- ECS

Data Architecture

- ETL/ELT
- BigData
- Pipelines
- NoSQL
- OLTP/OLAP

Languages

- Python
- JavaScript
- TypeScript

• Aureon

SaaS CRM & Sales Automation Platform

Multi-tenant SaaS for relationship management, communication and real-time sales analytics with event streaming.

- NestJS
- Next.js
- Kafka
- ClickHouse
- PostgreSQL
- Redis
- WebSockets

• DataCompass 1.0

WhatsApp Analytics Platform

Customer analytics platform via WhatsApp with Clean Architecture, Kubernetes (EKS) orchestration and infrastructure as code with Terraform.

- Node.js
- TypeScript
- Kubernetes
- Terraform
- AWS EKS
- GitHub Actions

• Track Data Platform

Oracle → ClickHouse Pipeline with PySpark

Data platform with PySpark orchestration, bronze/silver/gold layers, lineage catalog via FastAPI and Docker Compose infrastructure.

- PySpark
- ClickHouse
- Oracle
- FastAPI
- Python
- Docker

• EvoFit AI

AI-Powered Personal Trainer

Personalized workout app that uses AI to generate adaptive training plans. Monorepo with NestJS (Clean Architecture) backend and React/Vite frontend.

- NestJS
- React
- TypeScript
- PostgreSQL
- IA Generativa
- Docker

• Demandas

Modern Fullstack System

Complete fullstack with FastAPI + Clean Architecture on the backend, React 18 + Framer Motion on the frontend and Docker/Nginx containerization.

- FastAPI
- Python
- React
- MongoDB
- Docker
- Tailwind

\$ ls ./projects

FINANCIAL MANAGEMENT WEB SYSTEM

Bepass

Complete application for gyms and sports centers, using PHP, modern patterns and modular architecture.

USP PROJECT

Carnaval 4.0

Augmented reality applied to the Rosas de Ouro parade. Development with Python and containerized environments.

AUTHORED FRAMEWORK

Orion Framework

Layered architecture for resilient and governable pipelines.
[orion-ake.pages.dev](#)

\$ ls ./clients

BeAnalytic

CTO • [beanalytic.com.br](#)

Technical leadership in data and AI solutions for infrastructure, energy and retail.
